

AIRic

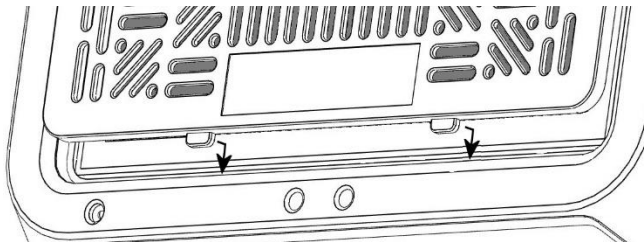

IMPORTANT – GETTING READY

The filter is sealed in a plastic bag for shipping. This bag must be removed before use or your **AIRic** system will not work properly. **NOTE:** The H13 filter may be damaged by bending or twisting. Use care when handling. Do not press on the filter media.

- Open the rear filter cover by pressing down the latch **1** and swinging the cover open.

- Remove the filter.
- Use scissors to carefully cut off the top of the plastic bag and slide the filter out of the bag.
- Place the filter back into the **AIRic** with the white front of the filter facing in and the black rear of the filter facing out.
- Place the tabs at bottom of the filter cover into the slots in the **AIRic** housing and swing the cover in place. Push the latch **1** until it locks.

- Your AIRic is now ready for use.

SAFETY PRECAUTIONS

WARNING: Please read all instructions before operation

and save these instructions for future reference.

- Indoor use only. Do not use outdoors.
- Operate using only the included power supply
- Do not plug in power supply with wet hands
